

Website Development

IT117 UNIT 4

Image Editors

MS Paint

Inkscape

GIMP

*Other options are fine as well
– no specific editor is required

When editing and saving images:

- No capital letters allowed in image file names
- No spaces allowed in image file names
- Should be .jpg .gif or .png files
- Save a working copy (and/or original) in addition to edited image
 - Always save original **photo** and edit a working copy
 - Save .png **graphic** for editing

Rules for Naming Images

The Element

HTML5 element is an empty (self-closing) tag (no closing tag)

- Required attributes:
- The src attribute
 - Specifies the file path leading to the image
 - Image files should be stored in a folder named images
src="images/filename.jpg"
 - Use the relative file path
- The alt attribute
 - Describes the image for the user who can't see the image in the browser
- The width and height attributes
 - Use the actual width and height of the image
 - **NEVER resize images using the width and height attributes**
 - **The purpose of the width and height attributes is to size the placeholder the same as the image. It is not intended for image sizing.**

Sample tag

```

```

Sample tag

```
<img_src="images/sunset.jpg" width="450" height="225" alt="beautiful sunset">
```

- Notice the space between each attribute

Sample tag

```

```

- Notice the space between each attribute
- Notice the quotation marks around the values for the attributes

Sample tag

```

```

- Notice the space between each attribute
- Notice the quotation marks around the values for the attributes
- **No label/unit for dimensions**

Sample tag

```

```

- Notice the space between each attribute
- Notice the quotation marks around the values for the attributes
- No label/unit for dimensions
- **No closing tag**

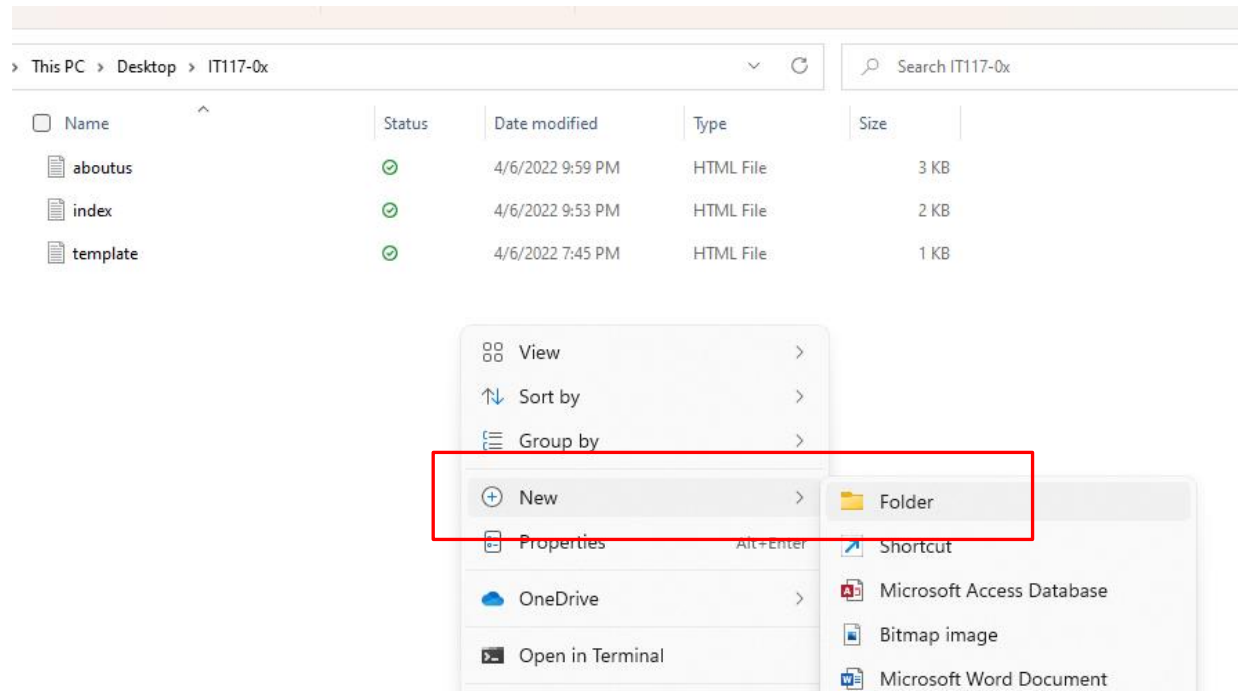

Unit 4 Assignment – Create Logo

Make all corrections noted in my feedback for Unit 2 and Unit 3

Unit 4 Assignment – Create Logo

Make all corrections noted in my feedback for Unit 2 and Unit 3

Create a new folder in your course folder (on your computer)

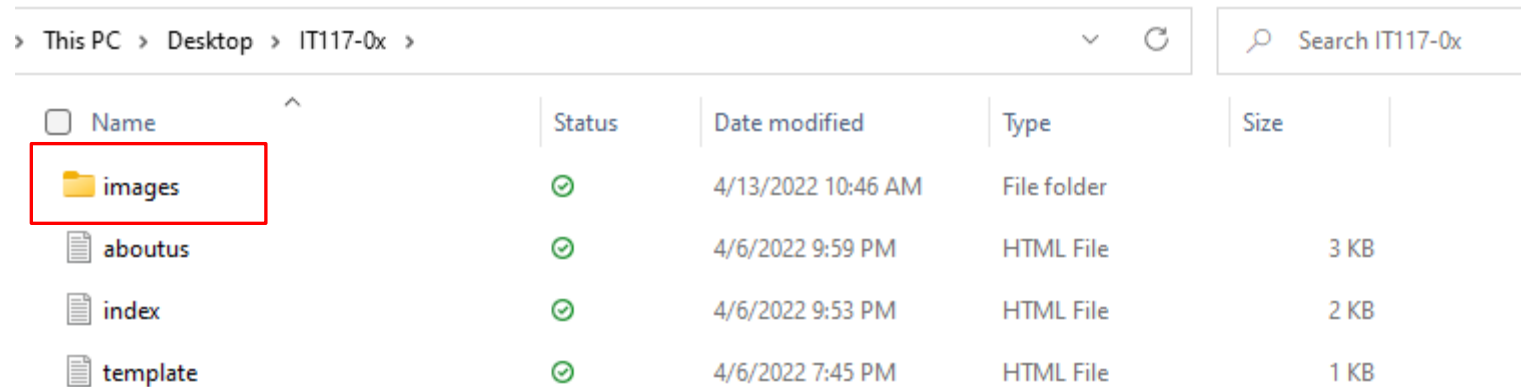

Unit 4 Assignment – Create Logo
